# OpenPro ERP Solutions

More Value. More Features.
*The first web based ERP software*

OPENPRO MANUFACTURING

By supporting a wide range of discrete production and process flow methods, OpenPro software gives manufacturers the flexibility and agility needed to remain competitive in a changing market place. Today, suppliers are under increasing pressure to meet customer mandated deadlines, configure product to order, manage inventory and run the shop floor efficiently, against the changing business models and an uncertain economic climate. The software's functionality offers the tools by which manufacturers can out-maneuver competition in the short-term and emerge as leading suppliers in the long run.

Within one system, OpenPro enterprise software supports the control, integration and synchronization of a variety of manufacturing process methods. OpenPro meets standards for ISO9000, APICS and FDA 21 CFR Part 11.
