There is a "POST" button below the "Note:" field. The browser status bar at the bottom shows "Done".

Affordable and Easy Warehouse Management

OpenPro's WMS software is affordable, and easy to install. The system is feature rich with an intuitive user interface. WMS comes in three cost effective versions that maximize efficiency and optimize labor productivity in warehouses of all sizes. Each version provides the basic functions for warehouse operations, including physical inventory, shipping, receiving, and picking, work order processing, time card management, as well as management features such as queries,

reporting and barcode labeling. WMS Professional includes advanced features like space management, user defined directed put-away and picks, batched order management, replenishment and cross-docking warning.

Support for Barcode Scanning

WMS state-of-the-art barcode data collection system runs on many popular portable data terminals (PDTs) and PDAs, suitable for use in warehouses. These devices support bar code and RFID reading, mobile computing and wireless networking (WiFi.) The PDT/PDA applications utilize the latest Microsoft® handheld computer operating systems including Windows CE® and Pocket PC®.

Flexibility and Upgrade Options

OpenPro WMS warehouse software has extensible functionality and a SQL database back-end provides a cost-effective upgrade path. Database and portable/workstation licenses can be added as the business grows. Upgrades are available for transition from WMS Batch to RF Standard to RF Professional or from batch/offline to wireless networking. OpenPro uses SQL server which means that an installation can comfortably manage tens of users and hundreds of thousands of SKUs with superb response time.

Support for Multiple Natural Languages

WMS speaks the language of the user. At its core, OpenPro's warehouse management system contains a multi-level data dictionary of display text for its forms and reports. You can manage any form text, PDA/PDT prompt, query, report or error message to conform to your in-house terminology. The data dictionary system provides support for foreign languages. WMS currently runs in warehouses where French, Latin American Spanish, and Castilian Spanish are spoken.

Barcode Labels

Barcode label printing comes standard with OpenPro's warehouse management products with embedded Bar Code Creator. By upgrading to OpenPro's developer, you can update or create any label format with different barcode symbologies and data from the OpenPro standard database.

Import-Export Utility

OpenPro ERP Software Solutions

Utility software is provided to populate the warehouse management system database and to export from it. Frequency of transfer is also established as an option. Data transfer runs as a background operation and does not require user intervention.

Motorola MC3000 Features for warehousing.

The Motorola MC3090 from Symbol Technologies is a lightweight, rugged mobile computer ideal for scan intensive environments that require high-quality data capture throughout the enterprise. The MC3090 offers a variety of features, including one-dimensional (1D) laser and 2D image scanning, color or monochrome display, batch or wireless communications, and three different keypad options.

Light, ergonomic design

Reduces user fatigue for higher productivity in scan-intensive applications

Well-balanced gun form factor option

Comfortable to use in intensive scan environments for prolonged periods

Visual scanning feedback on the sides (gun only)

Provides visual in addition to audio feedback without having to reorient the device

Laser versions with adjustable rotating scan turret with left, right and front positions

User can adjust the scanning positions for maximum comfort and productivity

320 x 320 resolution color/mono display (with backlight)

30% higher resolution than 1/4 VGA allows easy viewing in many environments for increased accuracy

Wireless 802.11b/g/a LAN connectivity

OpenPro ERP Software Solutions
10061 Talbert Avenue #200
Fountain Valley, California 92708
(714) 378-4600 www.openpro.com

Provides real-time data exchange for maximum productivity

Bluetooth option

Enables use of and wireless connection to a range of devices

Rugged design

Withstands multiple 4-foot drops (1.2 m) to concrete and up to 500 tumbles

IP54-rated sealing

Protects against water and dust for reliable performance in rough environmental conditions

Intel XScale PXA270 processor and Microsoft Windows CE operating system

Delivers high-speed CPU performance through familiar interfaces with wide software application support

Keyboard options include 28, 38 and 48 keys

Provides multiple data entry modes for maximum efficiency

Device management with Mobility Services Platform (MSP)

Enables real-time monitoring of critical mobile computer and wireless infrastructure parameters

Please contact OpenPro if you need any assistance in your bar-coding and warehousing needs.
